Profile

Very interested in creation of uniq and stylish webpages that are beautiful outside and intelligent under the hood. For this purpose I try to dive deep into this subject and to follow the best practices and mentors to write clean and high-performance code.

My current goal and interest is: to focus on React + Redux more deeply, probably to learn UI/Ux design in the future to stronger my work results and to make them look more interesting.

Skills

HTML5 (Use BEM methodology and W3C Validation in order creation of reusabile blocks and easily understood and verified code.)

CSS/SASS (Combine media queries, various units of measurement and breakpoints to find the best solution to an issue. Integrate variables, nesting, mixins, extends to simplify and clean css and scss files.)

JavaScript (Love to apply vanilla JavaScript to bring the site to life, add some interesting animations, sliders, popups, SPA, some simple games)

TypeScript (Usage of Everyday Types, Generics, specifying each variable in order to improve the code's quality and to avoid possible errors.)

Git, GitHub (Have git basic knowledge of working with branches, commits and repositories, teamwork experience(GitHub).)

Webpack, Vite (Have git basic knowledge of working with branches, commits and repositories, teamwork experience(GitHub).)

Eslint, Husky, Jest, Prettier (Usage of these tools to strength the code quality) • **React**

Education

JavaScript/Front-end Course(Stage1-2) & self-education   October 2022 – September 2023 | Online
The Rolling Scopes School ⧉
   Usage of TypeScript/JavaScript and Webpack to create strong SPA applications.
   Focused on
   • REST API
   • Commercetools
   • Eslint, Husky, Jest, Prettier

JavaScript/Front-end Course(Stage0)   June 2021 – September 2022 | Online
The Rolling Scopes School ⧉
