📄 CV

Profile

A few months ago I began my own long journey from a complete Zero in the frontend development sphere to Hero. Several month of self-education made it clear that I want to dive deep into this subject and to follow the best practices and mentors to write clean and high-performance code in order to become a demanded frontend developer that one day will use obtained skills to create uniq and stylish apps that are beautiful outside and intelligent under the hood.

Skills

HTML

Use different tags and BEM methodology in order of reusability of blocks and easily understood code.

JavaScript

Apply vanilla JavaScript to create some simple patterns and to obtain necessary skills in order to learn and understand more difficult structures in the future.

Git, GitHub

Have git basic knowledge of working with branches, commits and repositories.

CSS

Combine media queries and breakpoints to find the best solution to an issue.

SASS

Integrate variables, nesting, mixins, extends to simplify and clean css files.
